

## **RESET DEVICE**

To reset a light bulb we need to be sure that the light bulb is powered. Please follow these steps to get it done.

1. Turn the light bulb into a fitting
2. Power on the light bulb.
3. Turn the light bulb off and turn it on. Do this five times in a row.
4. Confirm the light bulb is now flashing rapidly.

If the light bulb is flashing rapidly the reset has succeeded.

If the light bulb is not flashing rapidly follow the steps bellow.

1. Power on the light bulb.
2. Turn the light bulb off and turn it on. Do this five times in a row.
3. Confirm the light bulb is now flashing rapidly.

If the light bulb is flashing rapidly the reset has succeeded.

If the light bulb is still not flashing rapidly repeat the steps above until the light bulb is flashing rapidly.
