# ADD GENERIC DEVICE

Now we start to install a generic device, please follow the steps below.

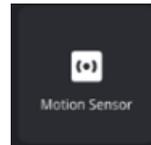

1. Press the button from the device you want to add.

For example:

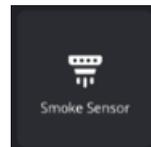

- Powerplug.

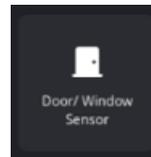

- Motion sensor.

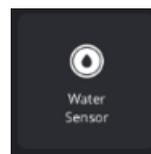

- Smoke sensor.

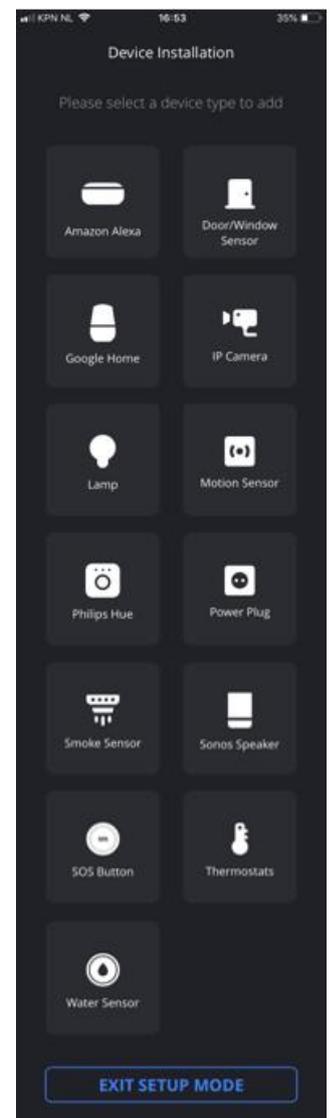

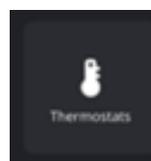

- Door/ window sensor.

- Water sensor.

- Thermostats.

## FAST MODE

After you pressed the device you want to install you will see the screen below.

To add the device we need to be sure that the LED is rapidly flashing. Please follow these steps to get it done.

1. Power on the device.
2. Hold the reset button for 5 seconds.
3. Confirm the LED is now flashing rapidly.

If the LED is flashing rapidly please follow the steps bellow.

1. Press the "Confirm" button.

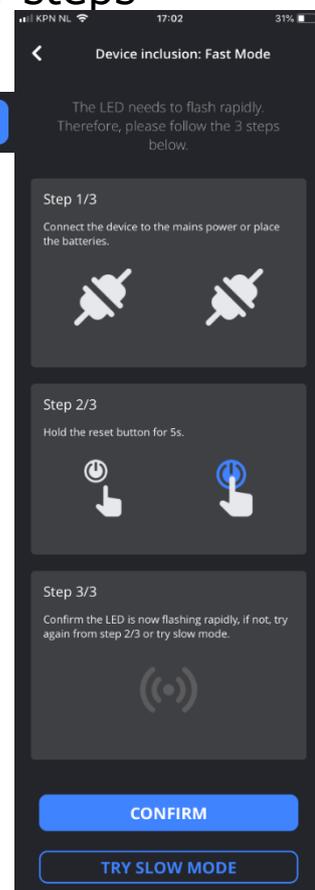

If the LED is not flashing rapidly follow the steps bellow.

1. Power on the device.
2. Hold the reset button for 5 seconds.
3. Confirm the LED is now flashing rapidly.

If the LED is flashing rapidly please follow the steps bellow.

1. Press the "Confirm" button.

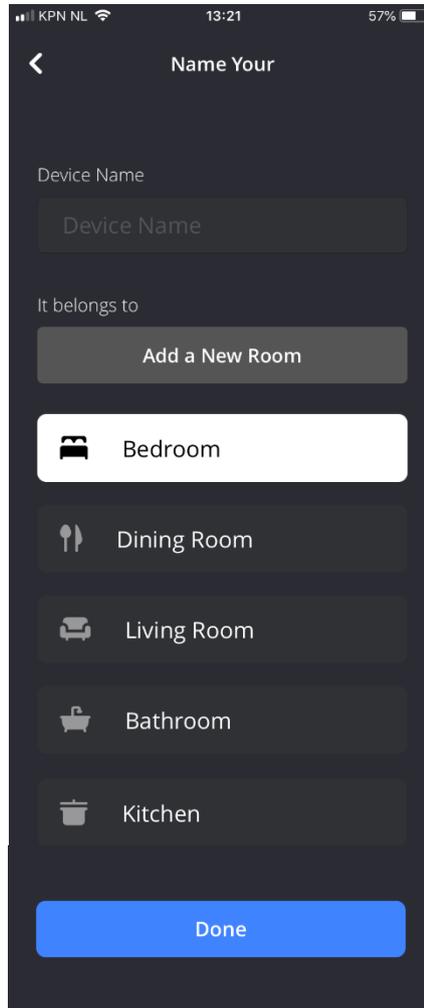

After you have managed to make the LED flash rapidly, and you have clicked confirm, you will see the screen below.

If you see this screen the Application is searching for a Generic device. (in this case a power plug)

# DEVICE FOUND

When Consolomio® found a device you will see the screen below. We can now name your device.

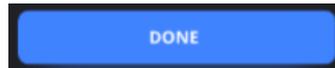

## NAME YOUR DEVICE

After adding a device we need to name your device. So please follow the steps below.

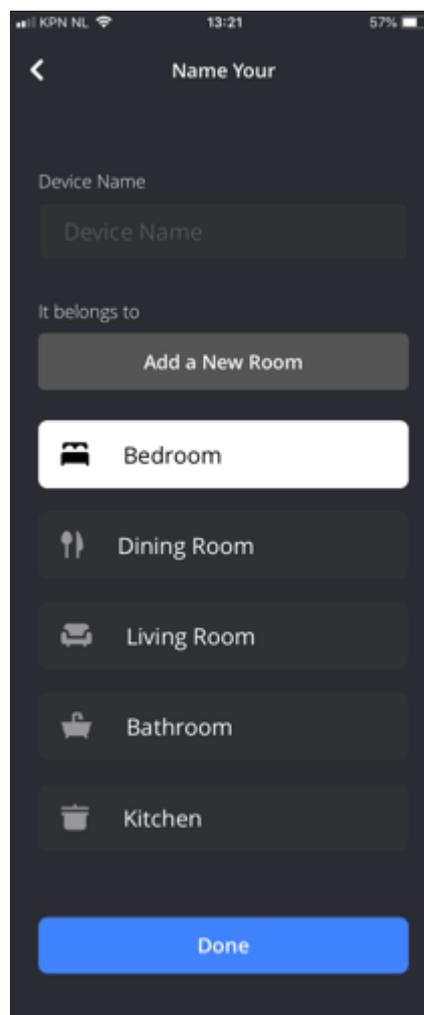

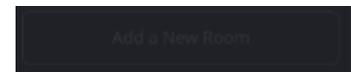

If you want to pick a room name from the list, please follow these steps.

1. Enter your device name.
2. Select a room which your device belongs to.
3. Press the "Done" button.

If you want to add a new room, please follow the steps below.

1. Press the Add a new room button.
2. Go to the chapter "Add a new room".

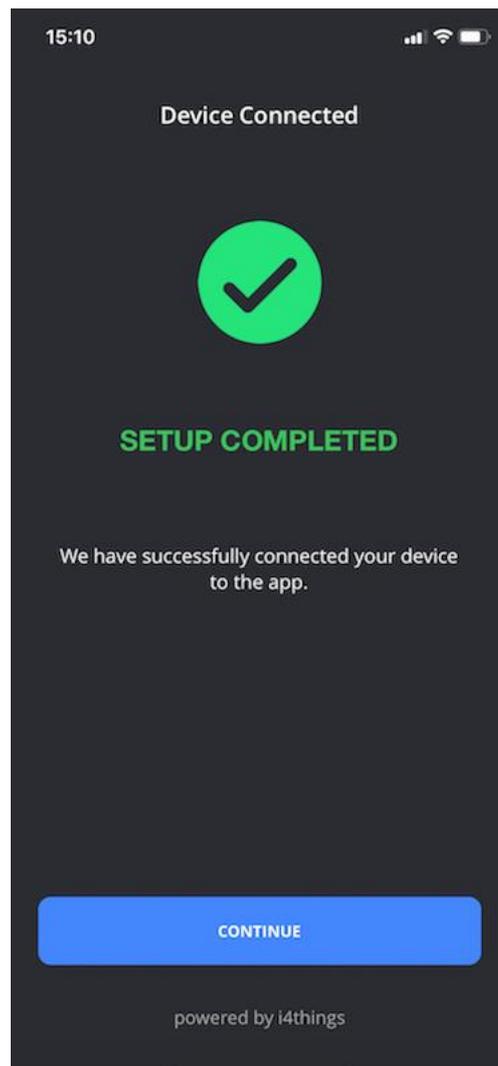

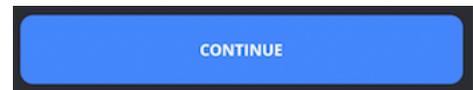

## DEVICE ADDED TO A ROOM

After you pressed the "Done" button you will see this screen.
